Betting Basics

order).

Quinella- The two selected dogs will finish in the first two places (in any order).

Triple- The three selected dogs will finish in the first three places (in exact order). The users will be shown the possibilities for the positions they chose to select within the Triple market.

Even/Odd- Predict if the number of the winning dog will be odd or even.

Over/Under- Predict if the number of the winning dog will be over or under 3.5.

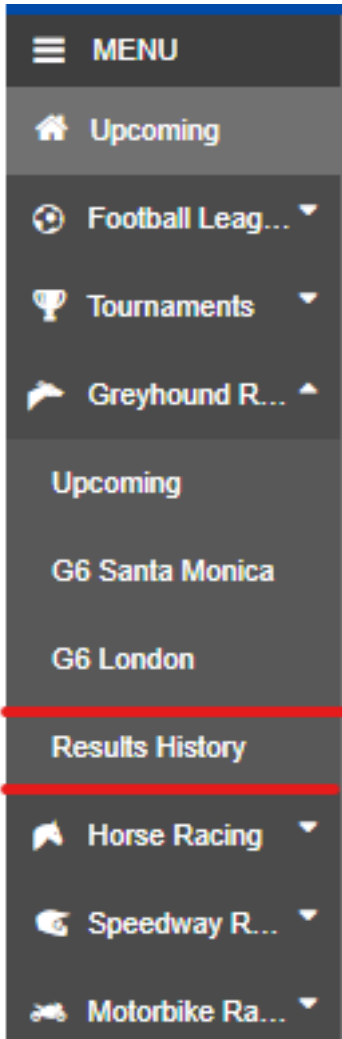

How are the results generated?

For the most part it's entirely random, with an algorithm completely steering the results, so nothing is certain here. You can pay attention to the odds though, as these should give you some idea of what's coming up, as well as watching several games before betting yourself.

How to check Results:

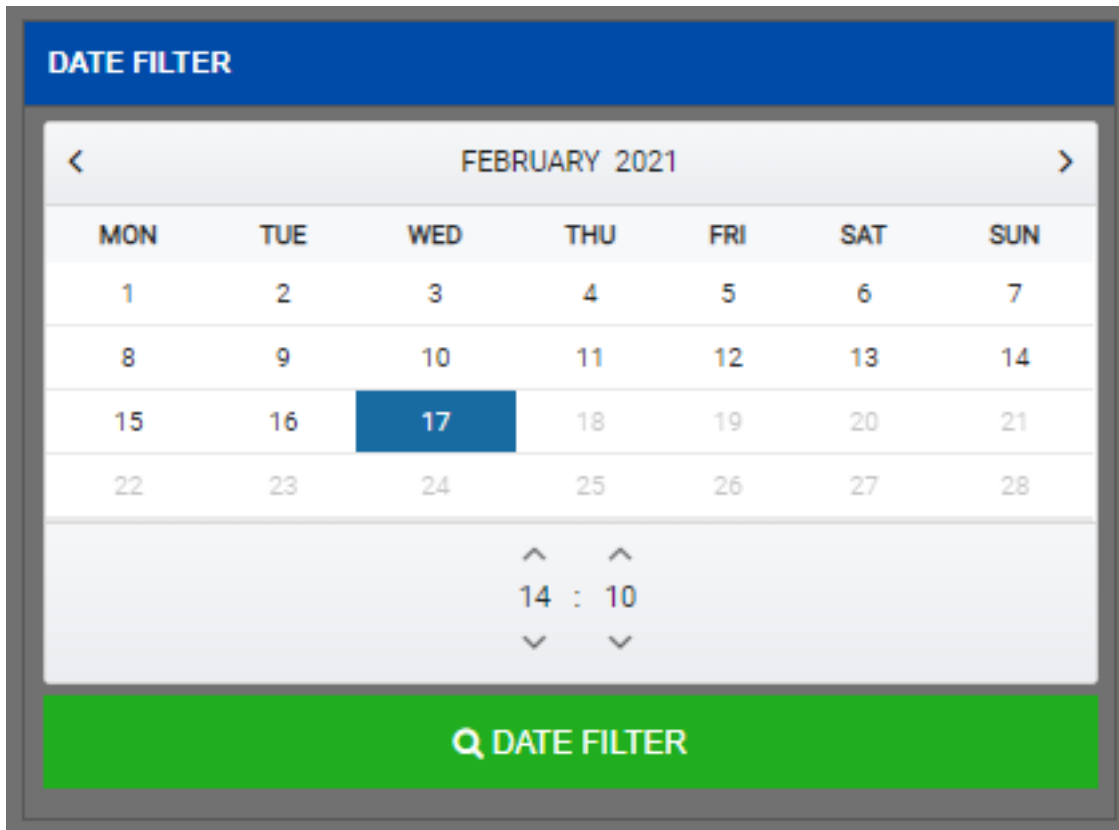

Every Golden race feature have a result history,

Betting Basics

where games placed can be filtered by the date and time the bet was placed.
