Home/Away Team to Win Both Halves

To win both halves is to predict if a specific team will win in the first half and also win in the second half.

Home to win both halves (YES): This is predicting that the home team will win in the first half and also win in the second half.

Home to win both halves (NO): This is predicting that the home team will win just one half or no half at all.

Same rule applies to Away team to win both halves.
