

# NairaBET Game Types

## Darts

Darts is a form of throwing game in which small missiles are thrown at a circular dartboard fixed to a wall.

Darts generally refers to a game whereby the player throws three darts per visit to the board with the goal of reducing a fixed score, commonly 501 or 301, to zero ("checking out"), with the final dart landing in either the bull's eye or a double segment.

A game of darts is generally contested between two players, who take turns.

Each turn consists of throwing three darts. When two teams play, the starting score is sometimes increased to '701' or even '1001'; the rules remain the same.

A darts match is played over a fixed number of games, known as legs.

A match may be divided into sets, with each set being contested as over a fixed number of legs.

The bet option available to dart on NairaBET is outright which means the winner to emerge in a particular competition, tournament or event.
