

# Nairabet Bet Combinations (Combo)

## What is a Doubles Bet?

A doubles bet is the simplest of all accumulators as it consists of just two selections, both of which need to be guessed correctly in order to qualify for a return.

All bets in a double must be on separate events. The bet slip of a doubles bet will look like the image below

The image shows a mobile application interface for a 'Betslip'. At the top, it says 'Betslip' with a question mark and a refresh icon. Below that is a blue bar labeled 'Accumulator' with a right-pointing arrow. The bet slip contains two selections:

- Pec Zwolle Vs Willem II Tilburg** with an 'X' icon to remove it. Below this, 'Pec Zwolle' is selected with an odds of **2.10**.
- Silkeborg IF Vs Hobro IK** with an 'X' icon to remove it. Below this, 'Silkeborg IF' is selected with an odds of **2.65**.

Below the selections is a blue bar for 'Stake:' with a white input field containing '100.00'. To the right of the stake field is a 'Clear all' button with a red 'X' icon. Below the stake field are two blue buttons: 'PLACE BET' and 'GET BET CODE'. To the right of these buttons, the following information is displayed:

- Total Odds **5.57**
- Winnings **556.50**
- Bonus **0.00**
- Total Winnings **556.50**

In a doubles betslip, match A is dependent on match B.

If you win match A then lose match B, you won't be credited for the bet slip because you lost it.

Unique solution ID: #1040
