

Nairabet Bet Combinations (Combo)

What is meant by "YANKEE"?

A Yankee consists of 11 possible bet combinations involving selections in 4 different events.

The bet includes 6 doubles, 4 trebles, and an accumulator

A double is a combination of 2 events, treble is a combination of 3 events and an accumulator in this instance means a combination of all 4 events.

E.g You place a yankee bet on games A,B, C and D.

Let's say your stake is N50, please note that your total stake will be $50 \times 11 = 550$

This is so because your stake is charged separately for each possible combination and winnings are credited for each correct combination as well.

Your combinations would be arranged thus:

6 doubles

$A*B \times 50 = \text{Winnings}$

$A*C \times 50 = \text{Winnings}$

$A*D \times 50 = \text{Winnings}$

$B*C \times 50 = \text{Winnings}$

$B*D \times 50 = \text{Winnings}$

$C*D \times 50 = \text{Winnings}$

4 Trebles

$A*B*C \times 50 = \text{Winnings}$

$A*B*D \times 50 = \text{Winnings}$

$A*C*D \times 50 = \text{Winnings}$

Nairabet Bet Combinations (Combo)

$B * C * D \times 50 = \text{Winnings}$

Accumulator

$A * B * C * D \times 50 = \text{Winnings}$

A minimum of 2 of your selections must be successful to get a return.
