

Nairabet Bet Combinations (Combo)

What does "LUCKY 15" mean?

Lucky 15 means placing a bet on 4 events and choosing 15 different combinations as accumulator.

The 15 possible combinations in lucky 15 involves 4 singles, 6 doubles, 4 trebles, and 1 fourfold.

A single is a selection of just 1 event, double is a combination of 2 events, treble is a combination of 3 events and a four-fold is a combination of 4 events.

E.g: You place a bet of lucky 15 of games A,B,C and D. Your stake is N50 but your total stake will be $50 \times 15 = 750$

Your combinations would be arranged thus:

4 singles

A X 50 = Winnings

B X 50 = Winnings

C X 50 = Winnings

D X 50 = Winnings

6 doubles

A*B X 50 = Winnings

A*C X 50 = Winnings

A*D X 50 = Winnings

B*C X 50 = Winnings

B*D X 50 = Winnings

C*D X 50 = Winnings

4 Trebles

Nairabet Bet Combinations (Combo)

$A*B*C \times 50 = \text{Winnings}$

$B*C*D \times 50 = \text{Winnings}$

$A*C*D \times 50 = \text{Winnings}$

$A*B*D \times 50 = \text{Winnings}$

1 four-fold

$A*B*C*D \times 50 = \text{Winnings}$

You must get the prediction for at least one match correctly for you to get a return.
